

BUILDING BRIDGES!

**MEADOWCROFT
SCHOOL**

**THE GALLERY &
PRIMARY**

ISSUE 4

From 18.03.19 to
22.03.19

Building Bridges Theme Day! Now, as a concept, this is certainly considered one of Meadowcroft's fortes. So, both the Gallery and Primary wasted little time showcasing their appreciation for such a concept both figuratively and literally, with a significant emphasis on teamwork!

Bridges were indeed built, but in a less conventional manner than one might expect... A hodgepodge of marshmallows, jelly babies (deliciously risky, I know), straws and spaghetti strands were all used to bring to life our pupils Humber bridge rivalling machinations (okay, a touch dramatic there, but they were pretty cool). Check out some of their creations below!

EXCAVATION!

Palaeontology, perhaps the coolest profession known to man... aside from archaeologists of course (god bless Indiana Jones). A big theme for primary this week in history has been what it's like to excavate in the name of dinosaur science!

As a way to simulate such discovery, forks were used to dig the raisins from cookies. A fine choice of simulation, concerning both Corey and Miss O'Donnell's peculiar fear of raisins. I've since coined it raisinophobia (it'll catch on, just wait).
